EXPERIENCE

Full Stack Developer, Schmidt Futures (via Codepath)

Jun 2022 – Aug 2022

San Francisco, CA (remote)

- Collaborated closely with cross-functional team roles to successfully deliver complex projects on time. Demonstrated effective communication and teamwork skills to ensure efficient coordination and integration of front-end and back-end components.
- Assisted with the design and implementation of a user-centric web application (capstone), focusing on intuitive navigation, responsive layouts, and efficient data management.
- Identified and resolved technical challenges by leveraging strong problem-solving and debugging skills. Employed best practices for testing and quality assurance, ensuring reliable and secure applications.

Web Developer Intern, Moving Mountains Tutoring and Mentoring

Jun 2021 – Nov 2021

Miramar, FL (remote)

- Supported and managed design and development project using Wordpress, with a focus on user experience for clients in the Education sector, resulting in an optimized landing page and decreased bounce rate.
- Successfully managed and organized site content in the WordPress dashboard, ensuring easy navigation and intuitive user journeys. Implemented user-friendly features and visual enhancements.
- Improved upon and updated standards for accessibility, usability, and performance optimization, and developed new functioning site components.
